

## About Us

Data Point Technologies is a full-service network infrastructure, data and telecommunications cabling company. Data Point Technologies provides cabling systems to support high-speed data and voice communication networks, to include both copper and fibre optic cabling.

Data Point Technologies provides each of our clients with a strategic approach to a broad range of communication solutions. With today's advances in cable technology and increasing bandwidth requirements, it is critical to consider the dynamics between network protocols, cabling system performance and life-cycle costs.

At Data Point Technologies we are committed to a quality policy that insures our products and services are supplied to consistently meet our client's requirements. Each cabling installation is tested and certified by trained quality assurance technicians. Every detail of the installation is also documented and tagged. Final test

results are submitted to our clients after the completion of each project.

We understand the specific needs of each customer to ensure that they are constantly informed of the latest technologies and products available in the developing market. By offering effective and efficient response to market requirements, Data Point Technologies delivers customer focused results.

Data Point Technologies really do provide the answer to all your data network requirements, with solutions such as:

- Network and Voice Cabling
- Security Camera Cabling
- Intercom/Access Control Cabling
- Electric Fencing

## Services

Our excellent service is a direct result of our trained and experienced staff, this coupled with world class suppliers and their brands makes Data Point Technologies a leader in the field of cabling.

The company offers an extensive range of services and products from the industry leaders, from one-man operations to large corporate enterprises. All products are sourced directly from the manufacturers ensuring superior brands at cost effective prices.

Our Services Include:

### Network and Voice Cabling

We are able to install and maintain networks based on Cat5, Cat5e, Cat6 and Coaxial standards. Services include:

- Installation of new networks and additional cabling/ relocation of existing networks.
- Cabinet tidies and moves.
- Testing and troubleshooting new and existing networks.
- Procurement and installation of network equipment, such as switches, copper and fibre patch leads, comms cabinets, cabinet accessories, etc.

We are also able to install and test fibre optic solutions that are suitable for high speed requirements such as backbones or links to remote buildings and cabinets. The main advantages of fibre optics are speed and being less susceptible to interference than traditional cabling methods. Both single mode and multimode solutions are offered.

### Security Camera Cabling

Data Point Technologies offers an affordable price solution, which allows you remote access to the system setup or cameras view.

We have longstanding experience with cameras, security and entrance systems installations. Our installations include solutions which offer central management and remote access possibility (you will have the possibility to do security checks from your home, on holiday, etc).

### Intercom/Access Control Cabling

Data Point Technologies offers a large selection of intercom systems, access control systems and cabling. We have a different setups depending on our clients needs and take pride in offering a professional solution fitted by qualified and experience technicians.

Our solutions are aimed at improving internal communications and ensuring the maximum security for all our clients.

### Electric Fencing

Data Point Technologies offers Electric fence applications to meet today's security needs. By installing a an electric fence the visual appearance will be a definite deterrent. If a house/property is fitted with an electric fence you are at a distinct advantage.

When wired and activated, the shock experienced will be of such a magnitude that it would deter a normal person from trying to enter the premises. If enabled the electric fence will activate an alarm when the wire is cut or shorted.

## Clients

Some of the clients which Data Point Technologies has had the pleasure of servicing include:

**Company:** Lesedi Corporate Technology

**Work performed:** Computer Cabling

**Company:** Barclays

**Work performed:** Computer Cabling

**Company:** U Car South Africa

**Work performed:** CCTV

**Company:** Concillium Technologies

**Work performed:** Computer Cabling

**Company:** Bastion construction

**Work performed:** CCTV

**Company:** Footwear Trading

**Work performed:** Computer Cabling

**Company:** Clinix Private Hospitals

**Work performed:** Computer Cabling

## BEE Status

At Data Point Technologies we take pride in being a 100% BEE (Black Economic Empowerment) owned, managed and operated SMME organisation. We have every intention to grow our business and in doing so create opportunities for fellow South Africans of all backgrounds.
